Joe and Coralie -

While I'm very grateful for the effort Coralie put in sending the files back in early November (I was there to see it), I know PIFWO and Guam flagged problems accessing the files soon after they were sent. It appears from this email string that we were still having troubles opening the files as late as 22 Nov in Guam (21 Nov in Hawaii). And I have not seen anything indicating that we ever received accessible files. Obviously until we can actually see what's in the files we can't analyze them.

So please assure we got files we could access before we are expected to discuss any analysis of those contents.

Thanks -
Mary

Apparently the copy we have in HNL doesn't open either.

Hi Coralie,

The last file on edge effects is what I was not able to open and the TUGU mpk file, the metadata was blank.

Thanks,

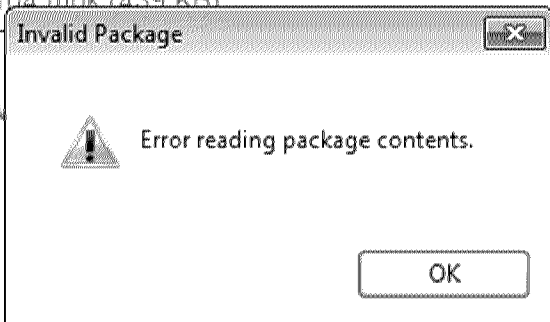

Jackie

Hi Coralie,

I am unable to open the last mpk file on the edge effect and the third document for Tuberolabium before and after the metadata was blank.
